## Data in many forms

Statistics Canada disseminates data in a variety of forms. In addition to publications, both standard and special tabulations are offered. Data are available on the Internet, compact disc, diskette, computer printouts, microfiche and microfilm, and magnetic tape. Maps and other geographic reference materials are available for some types of data. Direct online access to aggregated information is possible through CANSIM, Statistics Canada's machine-readable database and retrieval system.

## How to obtain more information

Inquiries about this publication and related statistics or services should be directed to: Canadian Centre for Justice Statistics, Statistics Canada, Ottawa, Ontario, K1A 0T6 (Toll-Free 1-800-387-2231) (telephone: (613) 951-9023) (fax : (613) 951-6615) or to the Statistics Canada Regional Reference Centre in:

Halifax (902) 426-5331  
Montréal (514) 283-5725  
Ottawa (613) 951-8116  
Toronto (416) 973-6586  
Winnipeg (204) 983-4020

Regina (306) 780-5405

## Ordering/Subscription information

### All prices exclude sales tax

Catalogue no. 85-223-XPE, is published annually as a standard paper product. The prices for delivery in Canada are \$32.00 and outside Canada for US \$32.00. Please order by mail, at Statistics Canada, Dissemination Division, Circulation Management, 120 Parkdale Avenue, Ottawa, Ontario, K1A 0T6; by phone, at **(613) 951-7277** or **1 800 770-1033**; by fax, at **(613) 951-1584** or **1 800 889-9734**; or by Internet, at [order@statcan.ca](mailto:order@statcan.ca). For changes of address, please provide both old and new addresses. Statistics Canada products may also be purchased from authorized agents, bookstores and local Statistics Canada offices.

This product is also available on the Internet as Catalogue no. 85-223-XIE for CDN \$24.00. Users can obtain single issues or subscribe at <http://www.statcan.ca/cgi-bin/downpub/feepub.cgi>.

## Standards of service to the public

Statistics Canada is committed to serving its clients in a prompt, reliable and courteous manner and in the official language of their choice. To this end, the agency has developed standards of service which its employees observe in serving its clients. To obtain a copy of these service standards, please contact your nearest Statistics Canada Regional Reference Centre.

## Note of appreciation

*Canada owes the success of its statistical system to a long-standing partnership between Statistics Canada, the citizens of Canada, its businesses and governments. Accurate and timely statistical information could not be produced without their continued cooperation and goodwill.*

## Foreword

This report is prepared by the Canadian Centre for Justice Statistics. The Centre is part of a federal, provincial and territorial enterprise known as the National Justice Statistics Initiative. The term "Initiative" refers to this unique partnership whereby all jurisdictions share authority and responsibility for developing and achieving common objectives for the collection, analysis and dissemination of justice statistics and information.

The mandate of the Initiative is to provide information to the justice community and the public on the nature and extent of crime and the administration of civil and criminal justice in Canada.

## Acknowledgements

The Canadian Centre for Justice Statistics (CCJS) gratefully acknowledges the assistance of Canadian police agencies and the Canadian Association of Chiefs of Police in making this report possible.

The paper used in this publication meets the minimum requirements of American National Standard for Information Sciences – Permanence of Paper for Printed Library Materials, ANSI Z39.48 – 1984.

## Introduction

Data for this report are collected from the Police Administration Annual Survey and the Uniform Crime Reporting (UCR) Survey, conducted by the Canadian Centre for Justice Statistics (CCJS). These two surveys are the main vehicles for collection and reporting of crime and police resources in Canada, and have been in operation since 1962. The purpose of the Police Administration Annual Survey is to collect information on personnel and operating expenditures for all police forces in Canada. The purpose of the UCR Survey is to count and describe those criminal incidents which are reported to or become known by the police.

Although the surveys collect information from all police forces in Canada, this report contains summary information only on Canada's **municipal** police forces which employ 64% of all police officers in Canada and provide policing services to 23.1 million Canadians (77% of the Canadian population). Municipal policing includes all police services which are paid for by the municipalities and includes contract policing provided to municipalities by provincial police forces and the RCMP. It should be noted that offences investigated by federal RCMP personnel, within a municipal policing jurisdiction, are not included in the crime statistics for that municipal police service.

The report is organized by province. Within each province, municipal police forces are grouped into one of five population ranges and the municipalities within each group are listed alphabetically. Municipalities that are policed by the RCMP and the OPP under municipal contracts are separated by a line from the other municipal police services and then arranged alphabetically within the five population ranges. For additional information on terminology and limitations, refer to notes on the following pages.

## Important Notes

### Population

Most municipal populations represent updated postcensal estimates for July 1<sup>st</sup> 1997 as provided by Demography Division, Statistics Canada and are rounded to the nearest hundred. The population estimates are based on usual place of residence. Populations for British Columbia municipalities were provided by the province. Populations for Aboriginal police services were provided by Indian and Northern Affairs Canada.

Population data are updated regularly and figures published in this report may differ slightly from figures published in earlier reports.

Municipalities are grouped according to the following population ranges:

- 100,000 +
- 50,000 – 99,999
- 15,000 – 49,999
- 5,000 – 14,999
- < 5,000

### Police Officers

Counts represent the "actual" number of sworn police officers (of all ranks) as of June 15<sup>th</sup>, 1997.

### Other Personnel

Counts include civilian and other personnel (e.g., clerical, dispatch, management, cadets, special constables, security officers, school crossing guards, by-law enforcement officers) on the police department's payroll as of June 15<sup>th</sup> 1997.

There are no "other personnel" included in the counts for the RCMP municipal policing contracts. The municipality may hire other personnel, but they are not included in this report.

## Expenditures

Figures include salaries, wages, benefits, and other operating expenses that are paid from the police force budget, as well as benefits paid from other government sources. They have been rounded to the nearest thousand. Revenues, recoveries, and those costs that fall under a police force's capital expenditures are excluded.

Many municipalities contract the RCMP to provide policing services. Expenditure figures for the RCMP in this report represent only the **amount billed to the municipality and not the total cost of the contract, nor any additional policing costs (e.g., accommodation, support staff, etc.)** incurred by the municipality. Under the RCMP billing agreement, municipalities with a population under 15,000 are billed 70% of total expenditures, and those of 15,000 and over are billed 90% of total costs.

As operational situations may vary considerably between police forces, so will the operational costs that result. For example, some costs (accommodation, by-law enforcement, court security) and some services (computing, personnel, and financial services) may be included within the police force's operational budget for some municipalities, but in other municipalities they may be paid for by other departments or through the police force's capital budget (which is excluded). **Comparisons should be made with caution.**

For most forces, data represents calendar year (January 1<sup>st</sup> – December 31<sup>st</sup> 1997) expenses. All RCMP municipal contracts are fiscal year (April 1<sup>st</sup> 1997 – March 31<sup>st</sup> 1998) expenses.

## Per Capita Cost

Figures represent expenditures divided by the population of the area serviced by the police force (rounded to the nearest dollar). For the reasons described above, **comparisons should be made with caution.**

## Population per Police Officer

Figures represent the population of the area serviced by the police force divided by the number of police officers.

For some forces, particularly those patrolling cottage or tourist areas, the population policed can fluctuate dramatically throughout the year, usually peaking during the summer months. Correspondingly, the number of police officers assigned to these forces may also fluctuate to accommodate these peak periods. Because the personnel data are collected for a specific point in time (June 15<sup>th</sup>) and the population estimates are based on usual place of residence only, these aspects are not captured.

## Crime Data

The “incident” is the basic unit of count used to report crime to the Uniform Crime Reporting (UCR) survey. An incident is the set of connected events which usually constitutes an occurrence report, a document used by police to record information. The UCR survey classifies incidents according to the most serious offence (generally the offence which carries the longest maximum sentence under the Criminal Code of Canada). Since one incident may include more than one offence, less serious offences are under-represented by the UCR survey.

In categorizing incidents, violent offences always take precedence over non-violent offences. For violent crime, a separate incident is recorded for each victim (i.e., if one person assaults three people, then three incidents are recorded; but if three people assault one person, only one incident is recorded). For non-violent crimes, one incident is counted for every distinct or separate occurrence. Robbery, a violent offence, is an exception to this rule. Unlike other violent offences, one occurrence of robbery is equal to one incident regardless of the number of victims. The reason for this exception is that robbery can involve many people who could all be considered victims, and would seriously overstate the number of robberies.

## Violent Crime

Violent incidents involve offences that deal with the application, or threat of application, of force to an individual. These include homicide, attempted murder, various forms of sexual and non-sexual assault, other sexual offences, robbery, and abduction.

## Property Crime

Property incidents involve unlawful acts with the intent of gaining property, but do not involve the use or threat of violence against an individual. Theft, breaking and entering, fraud, and possession of stolen goods are examples of property crimes.

## Total Criminal Code (C.C.)

This total reflects both violent and property crimes, as well as other Criminal Code offences (e.g., damage to property, prostitution). Criminal Code traffic incidents are excluded.

### Number

The “actual” number of incidents recorded by the UCR survey refers to the total that have come to the attention of the police and that have been substantiated through police investigation.

**Rate**

Figures represent the total number of incidents per 100,000 population.

**Clearance Rate (%)**

When a police investigation leads to the identification of a suspect against whom a charge could be laid, then that incident can be cleared. Criminal incidents can either be "cleared by charge" or "cleared otherwise". When an "information" is laid against the suspect (i.e., the person is formally charged), then from a statistical point of view the related "actual" incident can be "cleared by charge". In cases where the police do not lay an information, even though they have identified a suspect and have enough evidence to support the laying of such, the incident is "cleared otherwise". Examples include instances where alternative measures are recommended by the police, where the complainant declines to proceed with charges, or cases where the alleged offender dies before they can be formally charged.

The clearance rate reflects the total number of incidents cleared (by charge, or otherwise) during the year divided by the total number of incidents during the year.

Since the process of solving crime is often time-consuming, a criminal incident may be solved months or even years after it was reported to police and recorded by the UCR survey. Therefore, it is possible for the number of incidents cleared in a year to be greater than the total number of "actual" incidents that year, and thus for the clearance rate to exceed 100%.

**% Change in Rate of Total Criminal Code (C.C.) Incidents 1996-1997**

This figure represents the year-over-year percent change in the rate of total Criminal Code incidents (excluding traffic) per 100,000 population between 1996 and 1997.

**Criminal Code (C.C.) Incidents per Officer**

This figure represents the number of actual Criminal Code incidents (excluding traffic) reported to the police divided by the number of police officers.

Orillia (OPP) <sup>2</sup>	30,000	31	6	37	3	2,929	98	811

<sup>1</sup> Ottawa-Carleton policing jurisdiction was enlarged in 1997, therefore year-over-year comparisons are not presented.

<sup>2</sup> Due to restructuring of municipalities in Ontario, the Ontario Provincial Police (OPP) did not provide municipal crime data for 1997.

<sup>3</sup> Expenditures for 1997 were not available as the police force closed at the end of 1997 or early 1998, therefore 1996 expenditures were substituted.

<sup>4</sup> South Simcoe opened in 1997, therefore year-over-year comparisons are unavailable.

Tecumseh (OPP) <sup>2</sup>	13,900	9	1	10	-	735	53	1,390

<sup>2</sup> Due to restructuring of municipalities in Ontario, the Ontario Provincial Police (OPP) did not provide municipal crime data for 1997.

<sup>3</sup> Expenditures for 1997 were not available as the police force closed at the end of 1997 or early 1998, therefore 1996 expenditures were substituted.

<sup>5</sup> Meaford-Thornbury opened in 1997, therefore year-over-year comparisons are unavailable.
